

Logistics. Transporting innovation.

Magneti Marelli Parts & Services logistics

We deliver simplicity

Logistics services are the result of the **need to simplify** sales and distribution processes in the automotive aftermarket sector.

By optimising the management of **an interconnected and widespread infrastructure**, developed between 17 warehouses in 3 continents, and an **integrated system of advanced services**, Magneti Marelli Parts & Services is able to rapidly and efficiently satisfy the demands of distributors and spare parts retailers.

More than 80.000
automotive parts distributed

17 warehouses

A transparent warehouse

Focus on availability

In our warehouses, goods are moved quickly thanks to an automated system of **breakdown ordering** that is able to render each product available as quickly as possible. Once the stock has been identified in the warehouse, it is shipped directly from wherever it is located to the final customer, who can choose to receive their order via air or road.

EXAMPLE OF BREAKDOWN ORDERING

Transparent order management allows a company like Magneti Marelli Parts & Services to guarantee a rapid and extremely **efficient workflow**, capable of satisfying the most demanding distributors and spare parts retailers.

Advanced services

It's time to raise the volume!

We offer our customers **special services** designed to respond to all demands:

PALLET GO!

A new service for urgent and high volume orders (minimum one cubic metre of goods), even with same-day delivery

NEXT-DAY EXPRESS DELIVERY

ORDER READY

From the Cagliari warehouse for Sardinia. Single orders with 2 daily deliveries guaranteed

BREAKDOWN ORDERING

Advanced distribution from both local and central warehouses

DELIVERY TRACKING

TROUBLESHOOTING AND WARRANTY

PICK-UP AND DIRECT DELIVERY FROM PLANTS

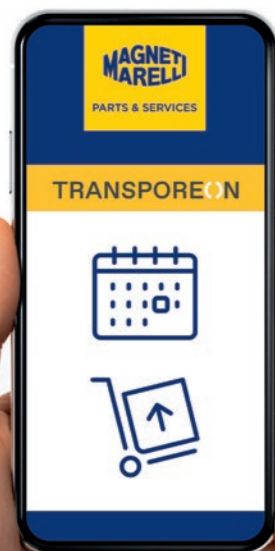

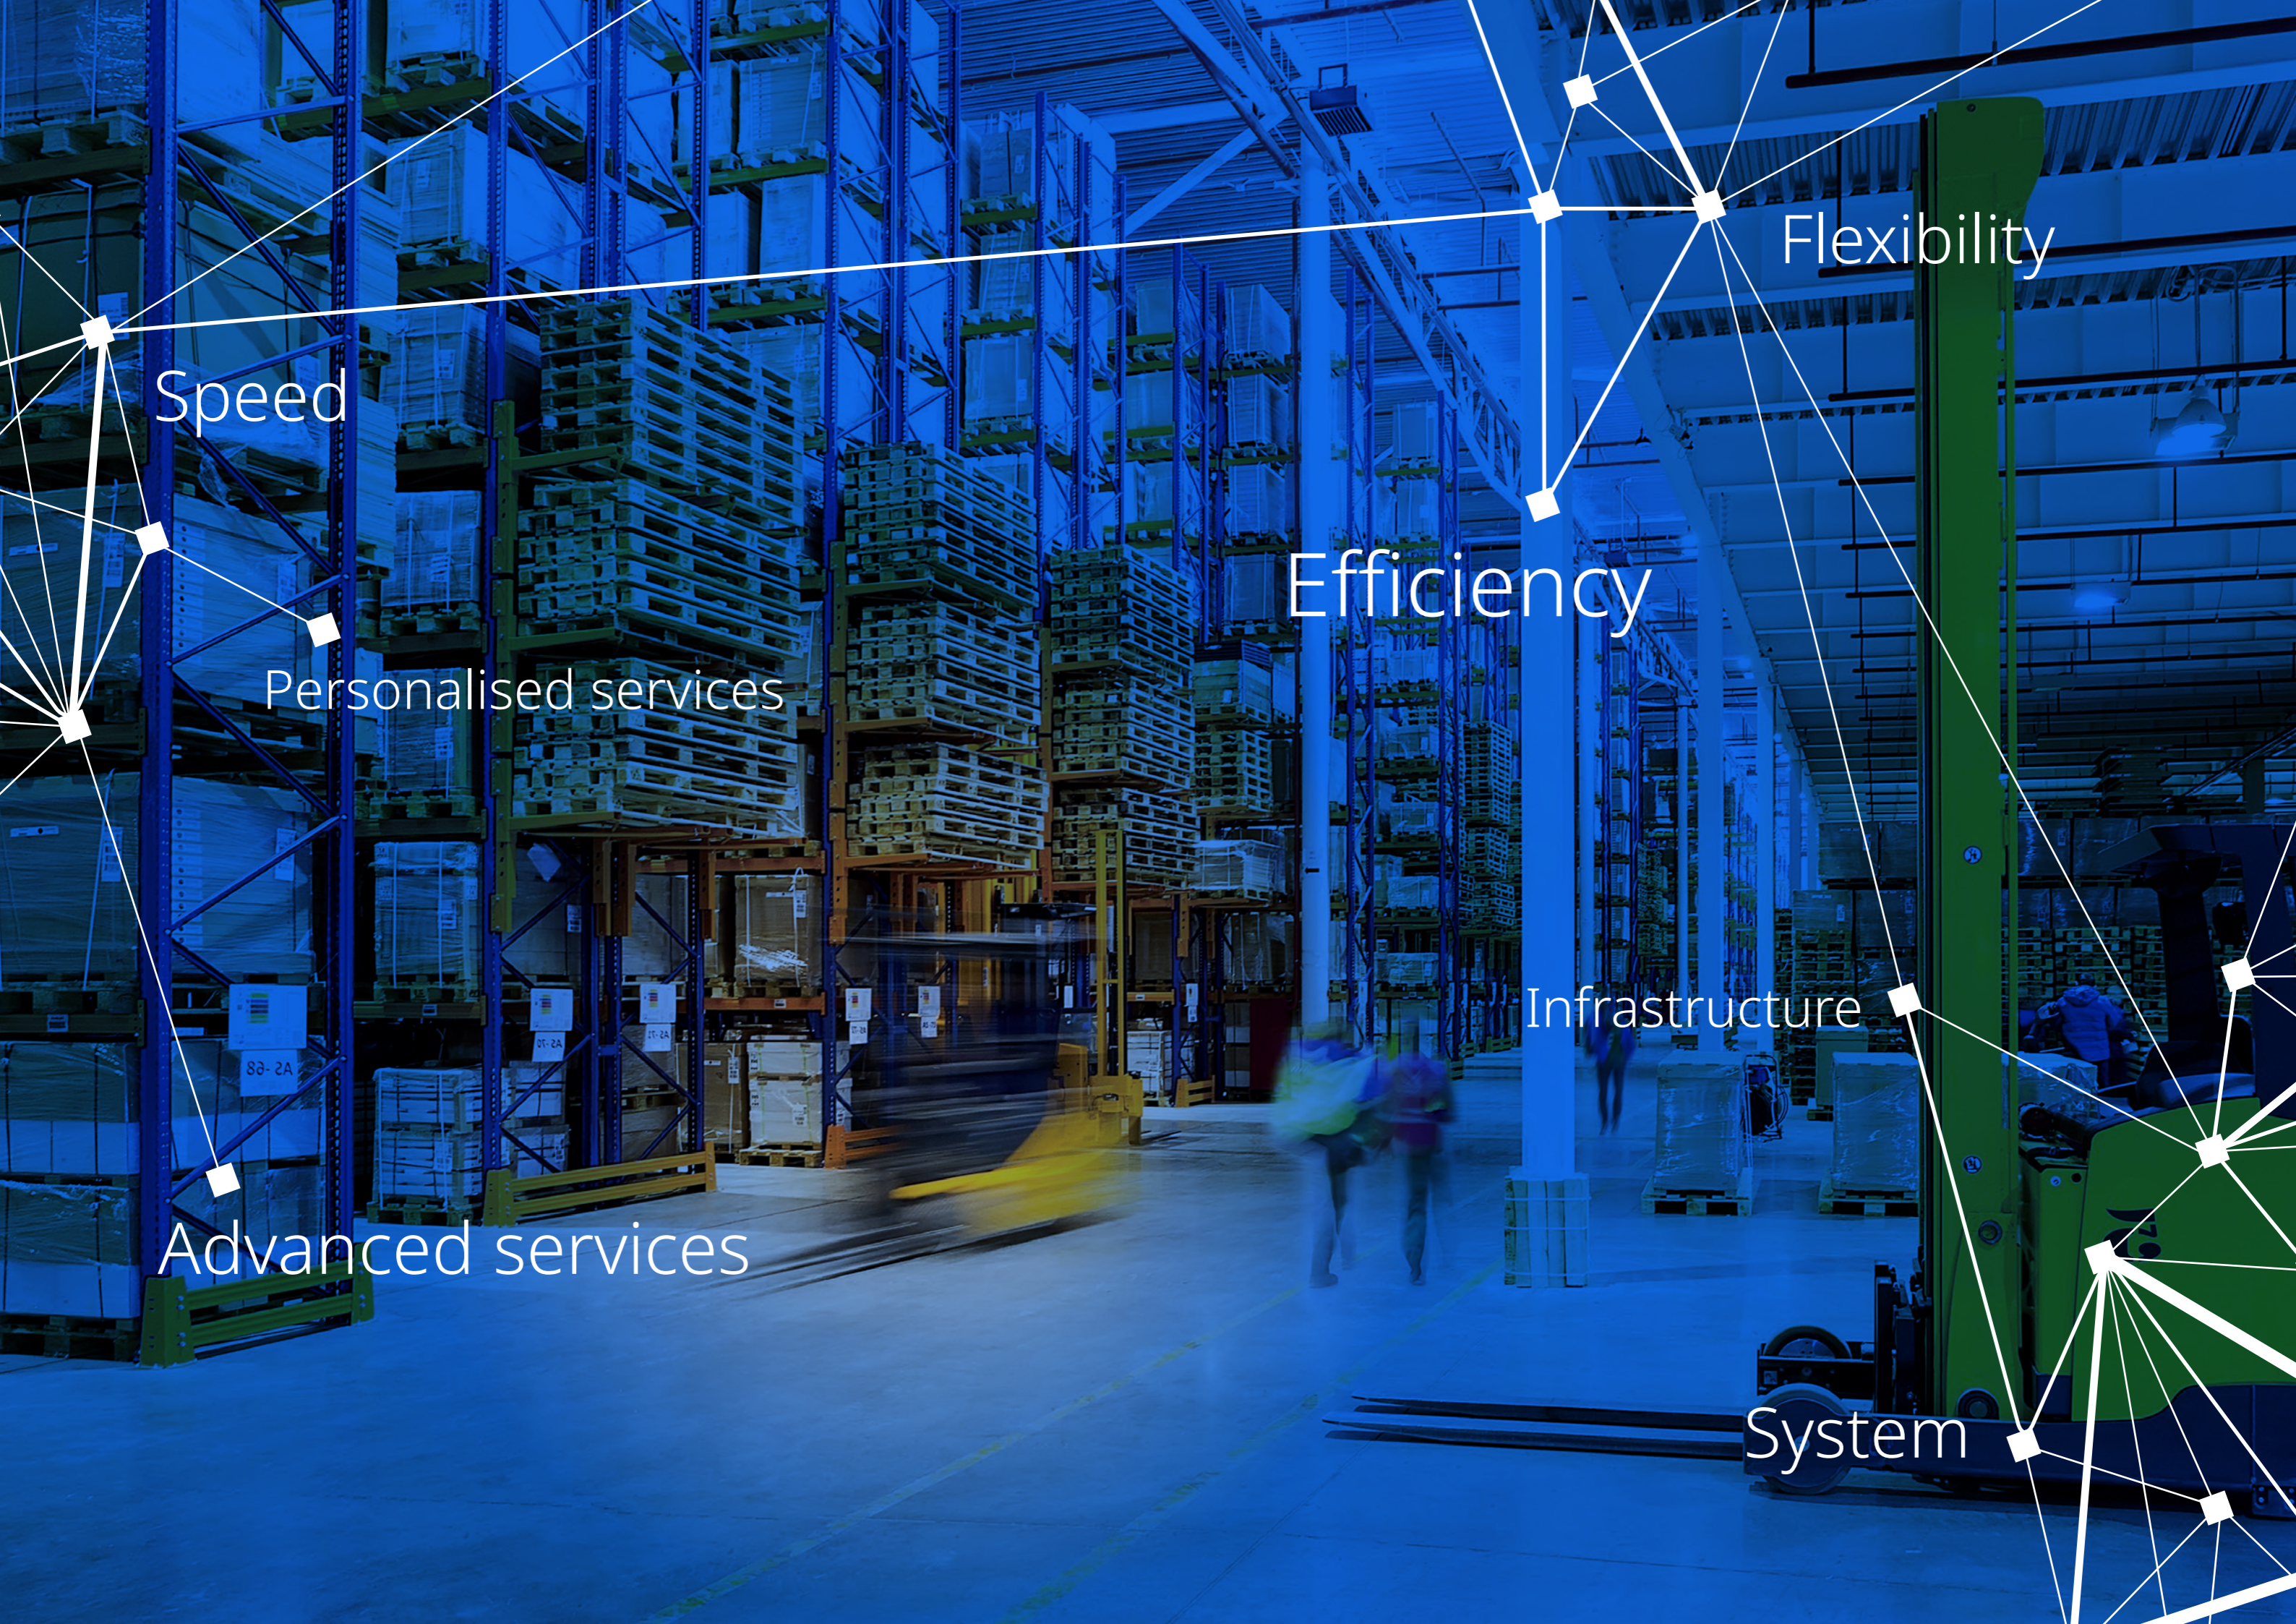

The Transporeon system

We manage goods and transport intelligently

Magneti Marelli Parts & Services uses the **Transporeon** platform to link the company, suppliers and shipping companies to create an integrated system of excellence capable of **reducing waiting times** and guaranteeing unloading of goods.

An intelligent solution for transport management that also helps the environment, reducing CO₂ consumption.
